ATPL(A). Type rating multi pilot aeroplane and single pilot complex aeroplanes with high performance. Proficiency check multi pilot aeroplane and single pilot complex aeroplane with high performance.

Instructions for completing form

- A. Please tick the appropriate boxes for relevant test/check. If the PC is conducted for the revalidation of a valid rating, please tick "Revalidate". If the rating has lapsed the applicant must have undergone approved refresher training. See part "F" page 2 in the protocol.
- R Please enter the complete information. "Licence endorsement" means the relevant type of aeroplane according to EASA Class and Type Rating List (Aeroplanes).
- C. Personal information of the applicant, always required

The following shall be documented before a Proficiency check;

Total flight time

The following shall be checked in the applicant's pilot logbook (conventional or electronic) and documented before a type skilltest

At least 70 hours PIC (Unless undergoing an MPL training course)

The following shall be checked in the applicant's pilot logbook (conventional or electronic) and documented before an ATPL skilltest

- At least 1500 hours of flight time in aeroplanes
- 500 hours in multi-pilot aeroplanes
- 500 hours as PIC under supervision; or
 - 250 hours as PIC; or
 - 250 hours, including at least 70 hours as PIC, and the remaining as PIC under supervision
- 200 hours of cross-country flight time of which at least 100 hours shall be as PIC or as PIC under supervision
- 75 hours of instrument time of which not more than 30 hours may be instrument ground time
- 100 hours of night flight as PIC or co-pilot
- Out of the 1500 hours of flight time, up to 100 hours of flight time may have been completed in an FFS and FNPT. Of these 100 hours, only a maximum of 25 hours may be completed in an FNPT.

If the applicant states PICUS flight experience, verification is required according to the following: Crediting of Pilot In Command Under Supervision (PICUS) flight time, with the purpose of reaching the requirement for an ATPL skilltest may be recorded as long as it is performed in accordance with AMC1 FCL.050 (b) (5). The Swedish transport agency require a written verification, from a manager such as a chief pilot, NP flight operations, chief flight instructor or equivalent position in the organization that the recording of the PICUS time has been done in accordance with AMC1 FCL.050 (b) (5). The actual recording of the PICUS flight time shall be done in accordance with AMC 1 FCL.050 (b) (1) (v).

AMC1 ARA.GEN.315 Applicant VERIFICATION OF COMPLIANCE By ticking this box you certify that you:

- (1) do not hold any personnel licence, certificate, rating, authorisation or attestation
- with the same scope and in the same category issued in another Member State;
- (2) has not applied for any personnel licence, certificate, rating, authorisation or attestation with the same scope and in the same category in another Member State; and
- (3) has never held any personnel licence, certificate, rating, authorisation or attestation
- with the same scope and in the same category issued in another Member State which was revoked or suspended in any other Member State.

Incorrect information could disqualify you from being granted a personnel licence, certificate, rating, authorization or attestation.

- D. This section is to be completed by the Head of Training of the ATO if the purpose is a skill test after basic training or a PC after approved refresher training for the renewal of a lapsed type- or class rating. If the training is performed as an approved zero flight time training course, the head of training must indicate it in the appropriate box. Applicants who have completed a Part-FCL type rating course at a non-Swedish ATO must attach the following documents
 - to the application:
 - Course completion certificate.
 - ATO Approval Certificate.
 - FSTD qualification certificate.
 - The Examiners certificate documents including copy of the licence.
 - Copy of the licence of the TRI responsible for the aircraft training or LIFUS as applicable.
- E. The result of the test. In case of non-Swedish examiner, the following attachments are required; The Examiners certificate documents including copy of the license

F. This section is a checklist with prerequisites for the examiner to check before the test/check. Please mind that a

AUPRT is required according to the table below and a certificate or verification of training/checking must be attached to the application.

First typerating AUPRT required

MPA→MPA AUPRT not required (credited) SP HPA→SP HPA AUPRT not required (credited)

SP HPA→MPA AUPRT required*
MP MPA→SP HPA AUPRT required*

- * An Advanced UPRT course is not required for a pilot who, within the three preceding years, has completed one of the following;
 - all the training and checking items in accordance with points ORO.FC.220 and ORO.FC.230 of Annex III (Part-ORO) to Regulation (EU) No 965/2012 or;
 - completed the training for an AUPRT instructor specified in point FCL.915(e)(1)(ii).

Applicants who wish to convert a third-country type rating into a Part-FCL type rating need to comply with the advanced UPRT prerequisite

Please note that the examiner must sign and thus affirm that he has checked all prerequisites before the test.

- **G**. 1. The following symbols mean:
 - P = Trained as Pilot-in-command or Co-pilot and as Pilot Flying (PF) and Pilot Not Flying (PNF) for the issue of a type rating as applicable.
 - X = Simulators shall be used for this exercise, if available, otherwise an aircraft shall be used if appropriate for the manoeuvre or procedure.
 - P# = the training shall be complemented by supervised aeroplane inspection
 - The practical training shall be conducted at least at the training equipment level shown as (P), but may be conducted up to any higher equipment level shown by the arrow (→).

The following abbreviations are used to indicate the training equipment used:

A = Aeroplane

FFS = Flight Simulator

OTD = Other Training Devices

- 3. The starred items (*) shall be flown solely by reference to instruments. If this condition is not met during the skill test or proficiency check, the type rating will be restricted to VFR only.
- 4. Where the letter 'M' appears in the skill test/proficiency check column this indicates a mandatory exercise.
- 5. A flight simulator shall be used for practical training and testing if the simulator forms part of an approved typerating course. The following considerations will apply to the approval of the course:
 - a. the qualification of the flight simulator or FNPTII as set out in Part-ORA;
 - b. the qualifications of the instructor and examiner;
 - c. the amount of line-orientated simulator training provided on the course;
 - d. the qualifications and previous line operating experience of the pilot under training; and
 - e. the amount of supervised line flying experience provided after the issue of the new type rating.
- 6. In the case of single-pilot high performance complex aeroplanes, when a skill test or proficiency check is performed in multi-pilot operations, the type rating shall be restricted to multi-pilot operations. If privileges of single-pilot are sought, the manoeuvres/procedures in 2.5, 3.9.3.4, 4.3, 5.5 and at least one manoeuvre/procedure from section 3.4 have to be completed in addition as single-pilot.

7. The following limits shall apply corrected to make allowance for turbulent conditions and the handling qualities and performance of the aeroplane used:

Height:

Generally	±100 feet
Starting a go-around at decision height	+50 feet/-0 feet
Minimum descent height/altitude	+50 feet/-0 feet

Tracking:

racking.				
On radio aids	±5°			
For "angular" deviations	Half scale deflection, azimuth and glide path (e.g. LPV, ILS, MLS, GLS)			
2D (LNAV) and 3D (LNAV/VNAV) "linear" deviations	Cross track error/deviation shall normally be limited to ± ½ the RNP value associated with the procedure. Brief deviations from this standard up to a maximum of 1 time the RNP value are allowed.			
3D linear vertical deviations (e.g. RNP APCH (LNAV/VNAV) using BaroVNAV)	Not more than -75 feet below the vertical profile at any time, and not more than +75 feet above the vertical profile at or below 1000 feet above aerodrome level.			

Heading:

All engines operating	±5°
With simulated engine failure	±10°

Speed:

All engines operating	±5 knots
With simulated engine failure	+10 knots/-5 knots

- 8. To establish or maintain PBN privileges one approach shall be an RNP APCH. Where an RNP APCH is not practicable, it shall be performed in an appropriately equipped FSTD.
- **H.** Details of the flight .Please enter the simulator approval number if the test is conducted in a simulator.
- Comments regarding the conduct of items.
- J. Additional information regarding the conditions during the test/check. E.g. Staff, weather etc.
- K. Specific requirements for pilots undertaking a zero flight time type rating (ZFTT) course aeroplanes (a) A pilot undertaking instruction at a ZFTT course shall have completed, on a multi-pilot turbo-jet aeroplane certificated to the standards of CS-25 or equivalent airworthiness code or on a multi-pilot turbo-prop aeroplane having a maximum certificated take-off mass of not less than 10 tonnes or a certificated passenger seating configuration of more than 19 passengers, at least:
 - (1) if an FFS qualified to level CG, C or interim C is used during the course, 1 500 hours flight time or 250 route sectors:
 - (2) if an FFS qualified to level DG or D is used during the course, 500 hours flight time or 100 route sectors.

Details of take-off and landing completed in a qualified FSTD and the number of initial take off and landings as part of a zero flight time training course. Please note that the form shall be submitted to Transportstyrelsen after the completion of the skill test. After completion of the zero flight time training, the completed form shall be submitted again.

L Details of the aeroplane training (landings).
