Application for Establishment of a Restricted Area or Danger Area

What does the application concern?

☐ Restricted Area	☐ Danger Area	☐ Temporary establishment	☐ Permanent establishment

Contact information

Organization or Name	Organisation Number

Address

Postal code	City/Town

Telephone Number	Email Address

Contact Person

Planned Activity

Justification

Information about the Area

Proposed name of the area. The name must be geographically connected to the local area.	
Upper limit of the area (altitude in AMSL or FL)	Lower limit of the area (GND or altitude in AMSL or FL)
Coordinates in WGS84, listed clockwise starting from the northwesternmost point	Radius in nautical miles (if the area is defined as a circle)

.

SWEDISH TRANSPORT AGENCY

Application for Establishment of a Restricted Area or Danger Area

Is buffer applied?	Lateral buffer in nautical miles	Vertical buffer in feet	Highest terrain elevation within the area
☐ Yes ☐ No			

Contact information for any activity in the area

The telephone number may, in some cases, be published together with aeronautical information for the area.
The number must be available to other airspace users who need information about ongoing or planned activities in the area.

Telephone Number	Email Address
Webbsite (URL), if applicable	

Time of Establishment (must be stated in UTC – Coordinated Universal Time)

From	To

Schedule and Times (if applicable):

☐ MON		☐ TUE	
☐ WED		☐ THU	
☐ FRI		☐ SAT	
☐ SUN		☐ Other additional notes	

Information about Coordination

Has the area been coordinated with other authorities or actors in the vicinity who use the airspace?	
☐ Yes	☐ No

If yes, what was the outcome of the coordination?

Can other aviation in the vicinity be affected by the restricted or danger area?	
☐ Yes	☐ No

Describe the expected impact:

For Restricted Areas only

Which restrictions do you consider should apply in the area?

Is there any particular operator who should be exempted from the restrictions?

Additional Material

Is any additional material attached to the application?	
☐ Yes	☐ No

If yes, specify which material is attached.

Application for Establishment of a Restricted Area or Danger Area

Instructions for Completing the Form

Information about the Area

1   The upper and lower limits of the area must be stated in feet (ft) with a height reference, or in flight level. Height reference can be AMSL (Above Mean Sea Level) or AGL (Above Ground Level).

2   If the lower limit coincides with the ground, GND (Ground) must be stated as the reference. If the lower limit coincides with the sea surface, SFC (Surface) must be stated.

Examples of correct notation of upper and lower limits:

- GND-4000 ft AMSL (the area extends from ground level up to 4000 feet above mean sea level).
- SFC-FL70 AMSL (the area extends from sea level up to flight level 70).
- 3000 ft AMSL-FL195 (the area extends from 3000 feet above mean sea level up to flight level 195).

3   Coordinates must be stated in WGS84 in the format DDMMSS with up to maximum three decimals. Coordinates should be ordered clockwise, starting with the northwesternmost coordinate

4   If the area is defined as a circle, the radius must be stated in nautical miles.

Time of Establishment

5   Times of establishment must be given as follows:

- YYYY-MM-DD, HH:MM (e.g., 2025-04-01, 12:00).

6   Schedules must be given as follows:

- DAY HH:MM-HH:MM (eg., MoN 07:00-16:00).
- If a whole day is applicable, H24 may be stated, or alternatively 00:00–23:59.

Times when the area will be used for activity

7   If the activity will take place within specific time intervals (e.g., daytime or Monday–Friday), this must be stated. The same format for dates, days, and times as in the examples above must be used.

- Example: MON–FRI 08:00–15:00 means the area is used every day Monday to Friday between the specified times.
