## Del 66 (Part 66)

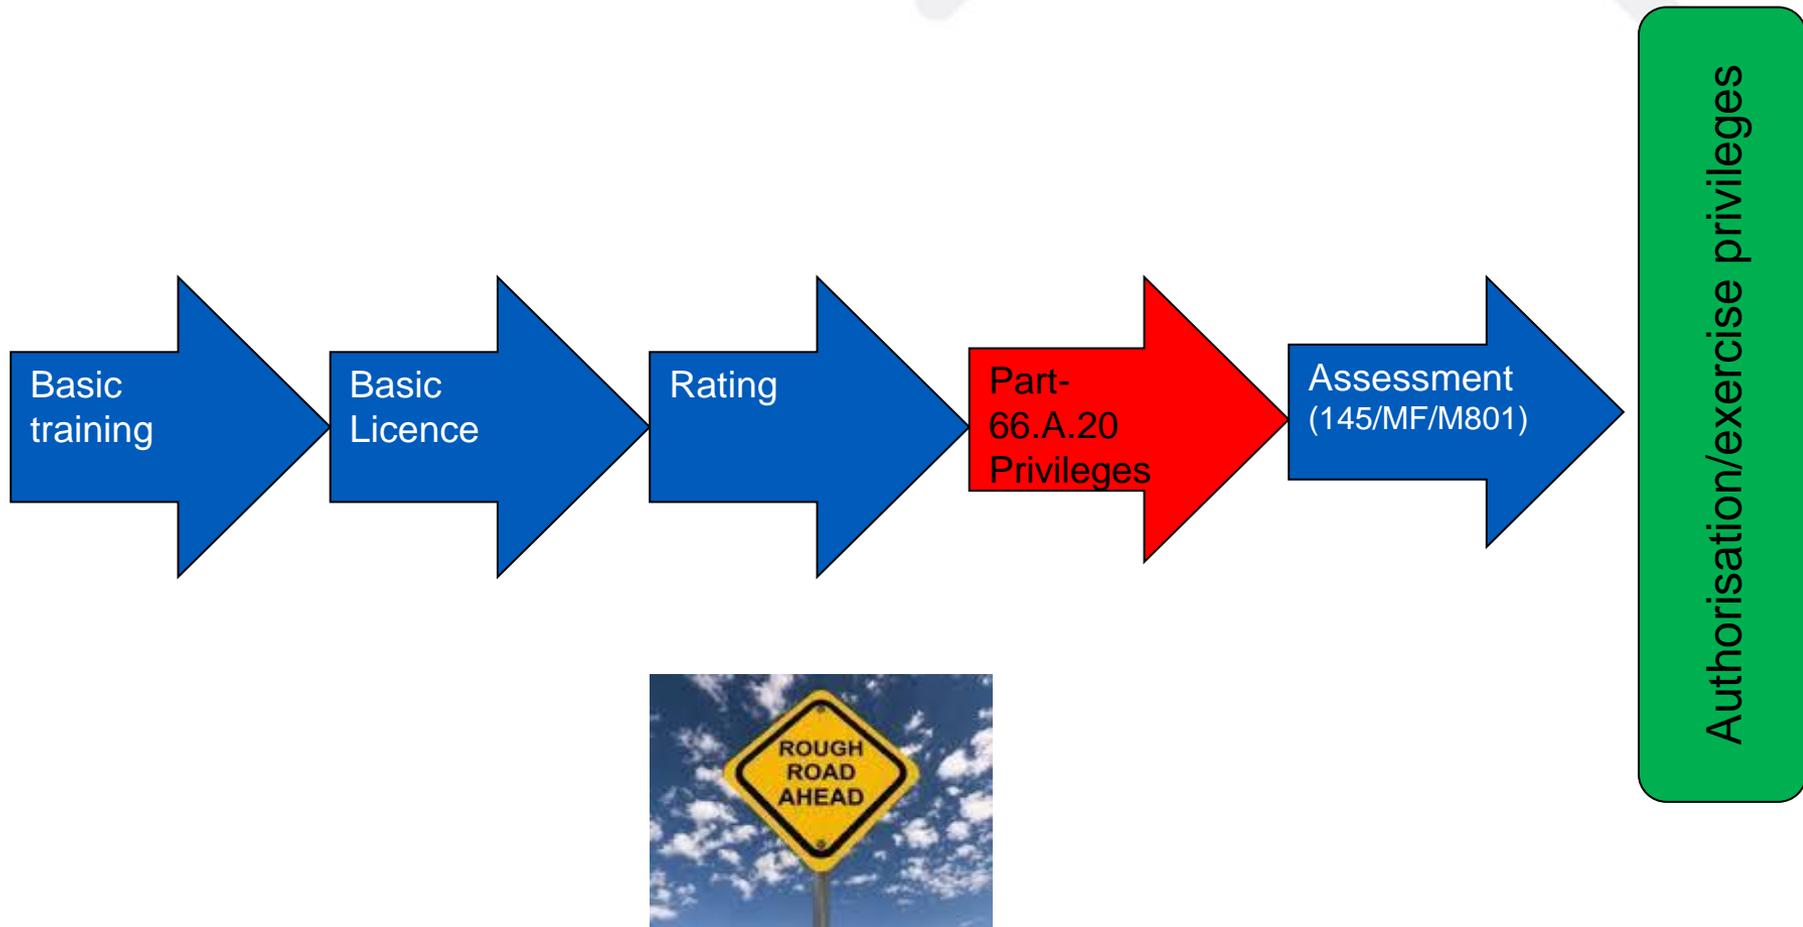

## Det här med befogenheter (Privileges)

Jukka Salo  
Fygteknisk inspektör

# Circle of Airworthiness Life!

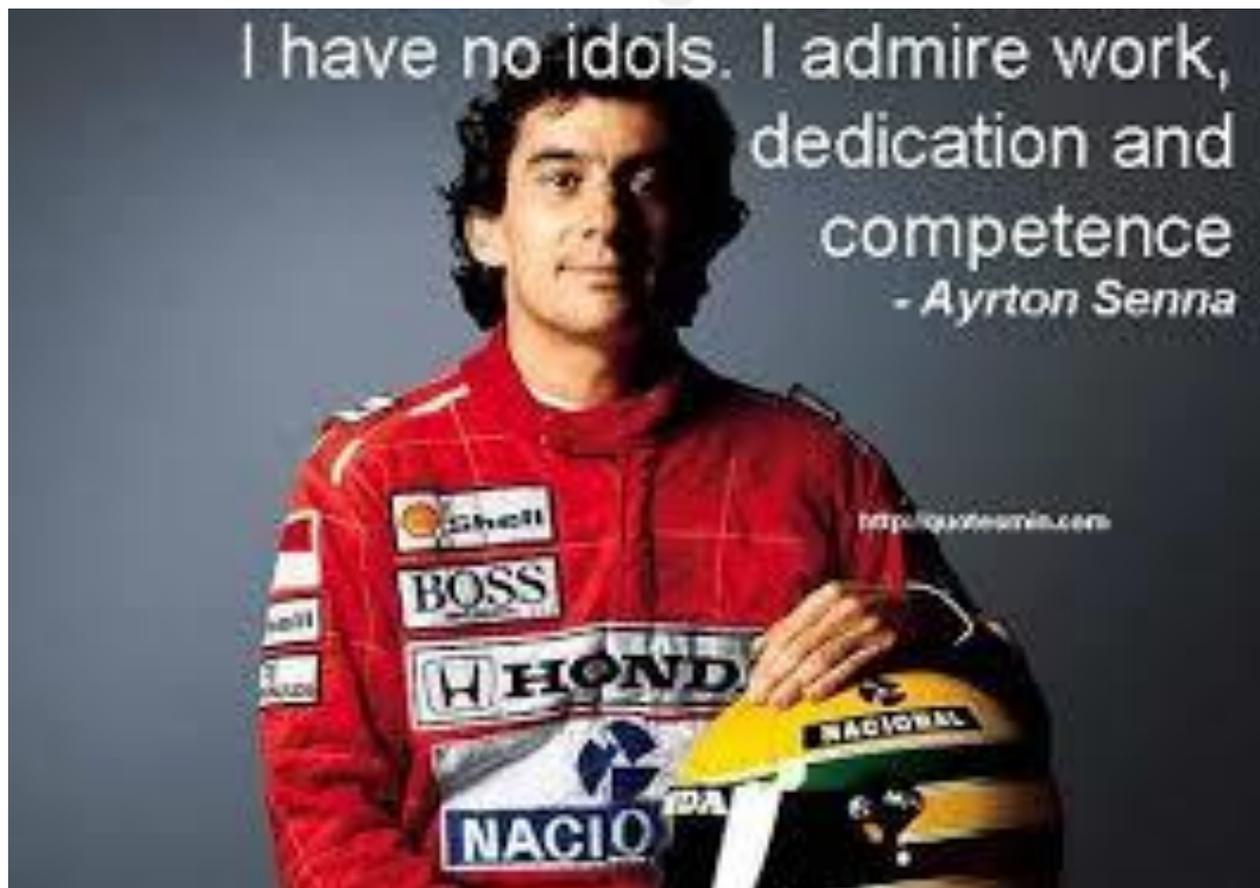

# Part-66.A.20

## 66.A.20(b) The holder of an aircraft maintenance licence may not exercise its privileges unless:

1. in compliance with the applicable requirements of Annex I (Part-M) and Annex II (Part-145); and
2. in the preceding 2-year period he/she has, either had 6 months of maintenance experience in accordance with the privileges granted by the aircraft maintenance licence or, met the provision for the issue of the appropriate privileges; and
- 3. he/she has the adequate competence to certify maintenance on the corresponding aircraft;** and
4. he/she is able to read, write and communicate to an understandable level in the language(s) in which the technical documentation and procedures necessary to support the issue of the certificate of release to service are written.

# Vad är kompetens?

# Vad är kompetens?

- A cluster of related abilities, commitments, knowledge, and skills that enable a person (or an organization) to act effectively in a job or situation.

# Vad är kompetens?

- **Vem skall bedöma individens kompetens...?**

# AMC 66.A.20(b)3 Privileges

- The wording *'has the adequate competence to certify maintenance on the corresponding aircraft'* means that the **licence holder** and, if applicable, **the organisation** where he/she is contracted/employed, should ensure that he/she has acquired the appropriate
  - **knowledge,**
  - **skills,**
  - **attitude and**
  - **experience***to release the aircraft being maintained.*

# Vad är kompetens?

“Remember the heirarchy of competence – see one, do one, teach one, become a regulator.”

# FAQ från EASA:s hemsida

- **I am a colour-blind. Does this prevent me from getting a Part-66 licence or exercising my licence privileges?**

u67768839 fotosearch.com ©

- Regulation (EU) 1321/2014 **does not require any medical examination** before applying for a Part-66 licence.
- Current 145.A.30(e) **requests certifying staff to receive a human factor training**

## Kom ihåg...

- **”Human Factors”** är *aldrig* en grundorsak till en händelse
- **Grundorsaken** är *den/de faktorer* som gav upphov till att **”Human Factors”** kunde tillåtas orsaka händelsen

## Common sense...

- **Inform the management** of your maintenance organisation:
- The **organisation** shall **establish and control the competence** of personnel; (145.A.30(e))
- The **organisation** shall have a **human performance programme** in place (145.A.35(e)); and
- The ICAO **safety management system** encourages to identify hazards and risks.
- **Find an agreement** with your company in order to list the maintenance tasks that you are allowed to carry out
- **Note: The same reasoning as explained above applies for any medical condition.**

# Kort om L och B2L licenser

- **Subject 1 (B2L):** Adapt the current licensing requirements for maintenance of avionics and electrical systems to the lower complexity of light aircraft.
- **Subject 2 (L):** Propose a simple and proportionate system for the licensing of certifying staff involved in the maintenance of aircraft other than aeroplanes and helicopters and of ELA1 aeroplanes.

## Category L ratings

- **L1C:** composite sailplanes
- **L1:** sailplanes,
- **L2C:** composite powered sailplanes and composite ELA1 aeroplanes,
- **L2:** powered sailplanes and ELA1 aeroplanes,
- **L3H:** hot-air balloons,
- **L3G:** gas balloons,
- **L4H:** hot-air airships,
- **L4G:** ELA2 gas airships, and
- **L5:** gas airships other than ELA2.

Vad är vad?	ELA1	ELA2
an aeroplane with a Maximum Take-off Mass (MTOM) of 2000 kg or less		x
an aeroplane with a Maximum Take-off Mass (MTOM) of 1200 kg	x	
a sailplane or powered sailplane of 2000 kg MTOM or less		x
a sailplane or powered sailplane of 1200 kg MTOM or less	x	
a balloon		x
a balloon gas or hot air volume =<3400 m3 for hot air balloons, =<1050 m3 for gas balloons, =<300 m3 for tethered gas balloons;	x	
a hot air ship		x
an airship =<four occupants and a maximum lifting gas or hot air volume =<3400 m3 for hot air airships =<1000 m3 for gas airships;	x	
a gas airship meeting all of the following elements: 3% maximum static heaviness, Non-vectorred thrust (except reverse thrust), Conventional and simple design of: structure, control system and ballonnet system Non-power assisted controls;		x
a Very Light Rotorcraft, 600 kg MTOM or less		x
