

## Reporting of statistical data

Holders of Air Operator Certificates issued by Sweden, and owners/users of aircraft registered in Sweden, are obliged to deliver statistical data in accordance with requirements issued by the Swedish Transport Agency (TSFS 2019:115). The data shall relate to the previous calendar year.

Owners of Swedish registered aircraft are obliged to report for the entire calendar year. If the aircraft has been de-registered from the Swedish Aircraft Register, the last registered owner is obliged to report.

A company that ceases to operate shall, within one month thereafter, submit a report concerning the activities during the year. If the aircraft during the year, or part thereof, has been leased or rented to companies engaged in commercial aviation, those companies are obliged to submit the report for the period concerned.

Please note that reporting is mandatory.
