

To whom it may concern

There are several courses included in the certificate of competency that you do not need to confirm by way of certificates or separate documentation. These are courses that form part of training programs such as the Master Mariner Program and the Marine Engineer Program.

When examining applications for permits to organise training programs or other training whose content is regulated by Standards of Training, Certification and Watchkeeping for Seafarers (STCW), the Swedish Transport Agency assesses the courses included to ensure they are conducted according to the respective table in the STCW Code.

The courses listed below are included in the respective certificates of competency that the Swedish Transport Agency issues. This means that you do not need to confirm them by way of any documents beyond the certificate of competency.

- Deck Officer Class V, IV, III, II and Master
 - Electronic Chart Display and Information System (ECDIS), according to table A-II/1 and A-II/2 and IMO Model Course 1.27
 - Automatic Radar Plotting Aid (ARPA) according to table A-II/I and table A-II/2
 - Automatic Identification System (AIS) according to table A-II/I
 - Bridge Resource Management (BRM) according to table A-II/I.
- Engineer Officer Class V, IV, III, II and Chief Engineer
 - Engine-room Resource Management (ERM) according to table A-III/I.

Certificates of competency issued based on an older approved training program that did not include ECDIS, entails a limitation, which is clearly indicated on the certificate of competency.
